What is NICHE?

- *Numeracy Infusion Course for Higher Education*
- A predominantly online course that is delivered through Blackboard
- A complement to the NICHE website, a repository of resources for quantitative reasoning instruction

<http://serc.carleton.edu/NICHE/index.html>

www.teachqr.com/

Development of NICHE

- Teaching QR is the responsibility of all faculty.

“Like learning to write well or speaking a foreign language, numeracy is not something mastered in a single course. . . . Quantitative material needs to permeate the curriculum, not only in the sciences but also in the social sciences and, in appropriate cases, in the humanities. . . .”

(Bok 2006: 104)

- QR skills deficits exist among students everywhere, but especially at CUNY.
- NICHE builds on a QR faculty development program initiated at Lehman College in the fall of 2010.

NICHE Goals

- Provide instruction on best practices for teaching QR. Engage faculty in activities, learning exercises and discussions that promote a better understanding of how to teach QR.
- Foster the development of instructional materials that make use of effective strategies for teaching QR and that ultimately improve students' understanding of QR.
- Infuse QR into a wide range of disciplines and CUNY institutions.
- Increase faculty interest and comfort in teaching QR. Strengthen participants' QR skills, if necessary.
- Establish a network of CUNY faculty who are committed to improving the QR skills of our students.

Best Practices for Teaching QR

- Use real-world applications and active learning, including discovery methods.
- Pair QR instruction with writing, storytelling and critical reading.
- Use technology, including computers, appropriately.
- Engage in collaborative instruction and group work.
- Be sensitive to differences in culture and learning styles.
- Scaffold the learning process. Provide feedback and opportunities for revision.

NICHE Content

Welcome to NICHE

1. QR: Making Numbers Meaningful
2. QR Learning Objectives
3. The Brain, Cognition and QR
4. QR and Writing
5. Discovery Methods
6. Representations of Data
7. QR Assessment
8. QR Stereotypes and Culture

Concluding Thoughts

- Successes
 - Interactive and dynamic discussions about readings, course materials, exercises, etc.

NICHE has caused faculty to rethink their pedagogy.
 - A wide array of high-quality instructional materials that address critical QR skills
 - A sense of community, with faculty working collaboratively to help one another

Concluding Thoughts

- Challenges
 - Technology
 - Faculty with lower levels of commitment to NICHE
