h-index	18	14

The h-index is an author-level metric that attempts to measure both the productivity and citation impact of the publications of a scientist or scholar.

The index is the number h of the scientist's most cited papers that have at least h citations

i10 index: 26 14

i10-Index = the number of publications with at least 10 citations.

RGR: **Reads** (opens/downloads) of Schild paper from just ResearchGate website

Titles in Bold: Papers that have been peer-reviewed or were invited to appear in a journal or book.

Schild 6/2024 Research Interest Score is higher than X% of RG researchers with work related to

- 97% **Mathematics Education**
- 96% Philosophy of Science
- 97% Political Economy
- 95% Socioeconomics
- 94% Probability Theory
- 94% Quantitative Social Research

h-index	18	14		14

The h-index is an author-level metric that attempts to measure both the productivity and citation impact of the publications of a scientist or scholar.

The index is the number h of the scientist's most cited papers that have at least h citations

i10 index:	26	14
	i10-Index = the number of publications with at least 10 citations.	

RGR: Reads (opens/downloads) of Schild paper from just ResearchGate website

Titles in Bold: Papers that have been peer-reviewed or were invited to appear in a journal or book.

Schild 6/2024 Research Interest Score is higher than X% of RG researchers with work related to

- 97% **Mathematics Education**
